Grant Application Guide:

Thrombosis UK is committed to supporting excellent research and educational activities. However an important part of this is to identify their impact on improving understanding, care and outcomes.

Impact may include:

- Academic impact
- Social impact
- Economic impact
- Increasing effectiveness
- Fostering sharing
- Promoting innovation
- Exampling joined-up, patient-centric care

Our primary criteria is excellence, so we want to understand how your request and application will make a positive difference to:

- Advancing understanding and education
- Reducing avoidable thrombotic events
- Improving patient care and patient outcomes
- Enhancing quality of life and health
- Informing judgments on economic use of finite resources
- Increasing effectiveness of your / a health service
- What you will do to share learning from your research / activity and disseminate your learning
- The potential benefits it will bring to the patients you care for

When applying for any funding from Thrombosis UK please outline in your application:

- The activity or area of research
- Why you are requesting grant support
- The estimated cost of the activity / project
- The amount you are seeking from Thrombosis UK
- How the funding would be used
- Other sources of income supporting this activity
- The expected outcome and impact of the focused activity
- Other parties involved or planned to be involved with the work
- Explain patient partner involvement in developing this project
- Outline your dissemination policy

Please note:

A clearly thought through application is an essential component of a research or activity proposal and a condition of funding. A clearly thought through and acceptable application should:

- Be project/activity-specific
- Focus on potential outcomes

Research applications should:

- Articulate a clear understanding of the context and needs of users and consider ways for the proposed research to meet these needs or impact upon understandings of these needs
- Outline the planning and management of associated activities including timing, personnel, skills, budget, deliverables and feasibility;
- Include evidence of any existing engagement with relevant users.
